

National Midwifery Institute
Clinical Form - Postpartum Skills Log

The following Skills log meets MEAC and NARM requirements for assessment of clinical readiness for entry-level practice upon graduation. Throughout their time at NMI, student can work on this log and fill out the pieces that apply to them at any given time for submission. They can submit this form however many times they need to.

Students and preceptors must assess and rate a student's skill level on the chart below. Students and preceptors are encouraged to revisit this form periodically to assess growth and increasing skill, with the goal of "3" on all skills. When a student has received a "3" on a skill, that skill no longer needs to be assessed on future assessments.

Any skills you are unable to demonstrate proficiency in real practice (due to legality in your area, rarity of occurrence, etc.)

When submitting this form, NOT ALL SKILLS NEED TO BE FILLED OUT, only fill out those you are assessing at this time (recent relevance). However, all skills must be evaluated, and receive a 3 from both preceptor and student, before graduation.

- 1 = beginning, learning a new skill*
- 2 = intermediate, performs skill with minor assistance*
- 3 = advanced, student at or near independent proficiency*
